

The Pew-MacArthur Results First Approach

Five simple steps to evidence-based policymaking

- 1 Results First provides a national database of evidence on program effectiveness.
- 2 The state adds and analyzes their own state-specific population and cost data.
- 3 The model calculates long-term costs and benefits for each program.
- 4 The model ranks programs according to their return on investment.
- 5 Policymakers consider the information during the budget process.
