

# TARGETED VIOLENCE PREVENTION WEBINAR

## Building a Culture of Care Through Behavioral Threat Assessment and Management

Join us to learn about the Roseville Joint Union High School District's behavioral threat assessment and management (BTAM) program and how their implementation journey has positively impacted school climate and reshaped stakeholders' view of safety efforts in schools. This has led to increased buy-in for referrals, participation in case management, efforts to increase student connectedness, and support for a Culture of Care across six high schools.
